

Timer Panel

Model No.: BT-SP102

Product Overview:

BishTech Timer Panel is a compact, reliable control panel for timed operation of equipment and processes. It provides flexible timing functions (one-shot, cyclic, interval, delay-on, delay-off), user-friendly front-panel programming, visual status indications, and robust relay outputs for driving alarms, motors, valves, or other field devices. Designed for industrial and commercial installations where accurate, repeatable timing control is required.

Special Features:

- Confirm IS 2189.
- Micro controller-based automation panel.
- LCD display with keypad programming.
- Automatic & manual (emergency) operation.
- Key-operated switch for security.
- ON / OFF emergency control buttons.
- Non-volatile memory (settings saved).
- Rugged powder-coated MS enclosure.

Technical Specifications:

- **Supply:** AC 220–440 V, 50 Hz
- **Display:** Alphanumeric LCD
- **Output:** Relay output (10 A @ 250 VAC, typical)
- **Modes:** Automatic / Manual
- **Mounting:** Wall-mounted
- **Protection:** IP44 / IP54 (optional)
- **Operating Temp.:** -10 °C to +55 °C
- **Origin:** Made in India
