

## Warbling Siren Panel

Model No.: BT-SP101

### Product Overview:

BishTech Warbling Siren Panel is a compact, industrial-grade control panel designed to operate warbling sirens and associated audible alert systems. The panel supports both automatic (warbling) and manual operation, includes local reset and power/siren indicators, and a keyed control for secure operation. Rugged metal enclosure and easy wiring make it ideal for industrial, commercial and hazardous-area premises where high-decibel warning signals are required.

### Special Features:

- As per IS -2189 Standard.
- Automatic warbling & manual siren operation.
- Reset function for system acknowledgement.
- Key-operated switch for secure control.
- Power ON & Siren ON LED indications.
- Rugged powder-coated MS enclosure.
- Easy wall mounting & reliable relay output.
- Suitable for industrial & commercial emergency use.
