

Manual Release Call Point

Model No.: BT-MR01

Product Overview:

Manual Release Call Point is designed to provide a reliable manual activation interface for Fire Alarm and Gas Suppression Systems. Manufactured from high-quality ABS thermoplastic polymer, the call point ensures durability and long service life in demanding environments.

The unit features a transparent protective cover that prevents accidental operation while allowing quick access during emergencies. In the event of a fire or emergency, the user can lift the protective cover and press the release switch to activate the connected fire alarm or gas suppression control panel.

BT-MR01 is equipped with a resettable mechanism that can be restored to normal condition using a dedicated reset key, eliminating the need to replace or break the glass after activation. The call point is supplied with a factory-fitted back box suitable for surface or semi-flush wall mounting, making installation simple and convenient.

Features:

- Confirm IS 2189.
- Wall Mount facility.
- Compatible with Any Conventional Fire Alarm Panel.
- Prime Quality Product.
- Suitable for industrial environments such as factories, warehouses, power plants, refineries, and manufacturing units.

Technical Specifications:

- Power I/P : DC – 24V
- Housing : ABS thermoplastic
- Weight : 0.150 Kg (without Packaging)
- Current Consumption Normal/Fire : 10mA/60mA
- Usage/ Application : For Fire Safety Applications.

Mechanical Specification:

- Dimensions : 3.5 (L) X 3.5 (H) X 2.25 (D) in inch's
: 90(L) X 90(H) X 60(D) in mm
- Colour : Red
- Construction : ABS thermoplastic polymer
- IP Rating : IP24D
